

A. Query 1

Business Question:

How many comments are available in the dataset?

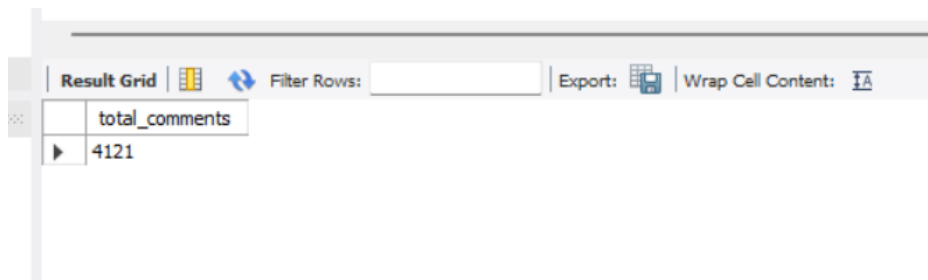

SQL Concept Used:

- COUNT(*)
- Aggregate Function

SQL Query:

```
SELECT COUNT(*) AS total_comments
```

```
FROM youtube_comments;
```

The screenshot shows a SQL query result grid. The header row is labeled 'total_comments'. The first data row shows the value '4121'. The interface includes a toolbar with options like 'Result Grid', 'Filter Rows', 'Export', and 'Wrap Cell Content'.

total_comments
4121

Business Insight:

The dataset contains **4,121 unique comments and replies**, collected from five YouTube videos related to Data Analyst learning topics.

B. Query 2:

Business Question:

How many videos are included in the analysis?

SQL Concept Used:

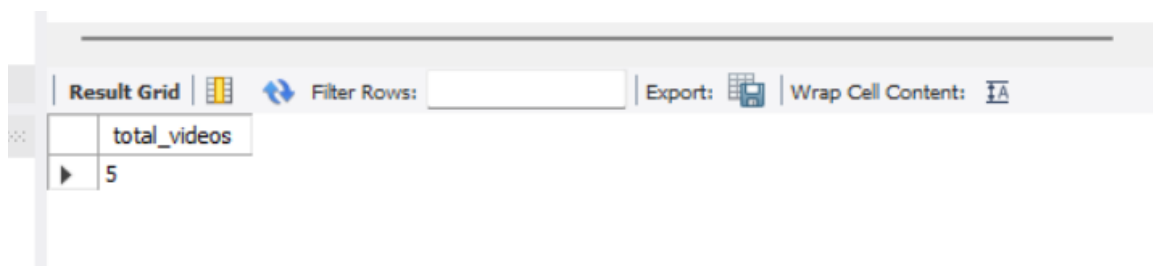

```
COUNT(DISTINCT)
```

SQL Query:

```
SELECT COUNT(DISTINCT video_id) AS total_videos
```

```
FROM youtube_comments;
```

Result:

The screenshot shows a SQL query result grid. The header row is labeled 'total_videos'. The first data row shows the value '5'. The interface includes a toolbar with options like 'Result Grid', 'Filter Rows', 'Export', and 'Wrap Cell Content'.

total_videos
5

C. Query 3:

Business Question:

How many different users participated in the discussions?

SQL Concept Used:

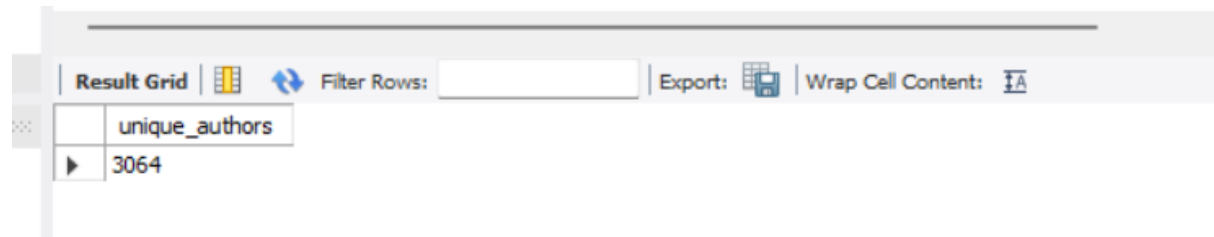

COUNT(DISTINCT)

SQL Query:

```
SELECT COUNT(DISTINCT author_name) AS unique_authors
```

```
FROM youtube_comments;
```

Result:

unique_authors
3064

D. Query 4:

Business Question:

What proportion of the dataset consists of original comments versus replies?

SQL Concept Used:

- ☐ GROUP BY
- ☐ COUNT

SQL Query:

```
SELECT
```

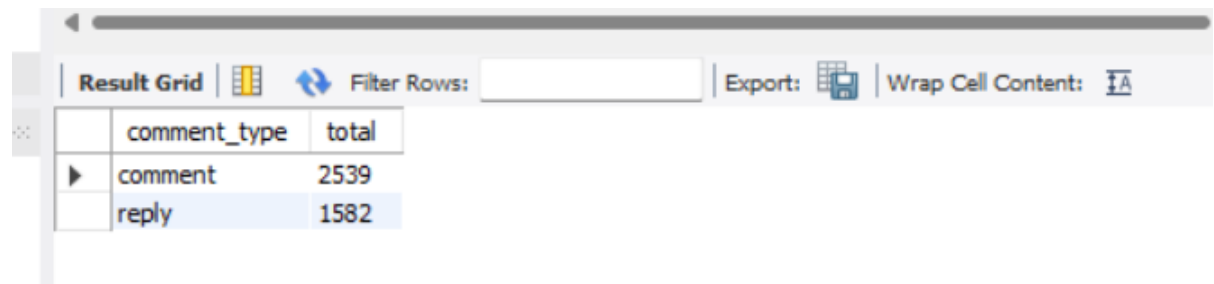

```
    comment_type,
```

```
    COUNT(*) AS total
```

```
FROM youtube_comments
```

```
GROUP BY comment_type;
```

Result:

comment_type	total
comment	2539
reply	1582

E. Query 5:

Business Question:

Which learning topic generated the highest audience interaction?

SQL Concept Used:

- ☐ GROUP BY
- ☐ ORDER BY

SQL Query:

SELECT

topic,

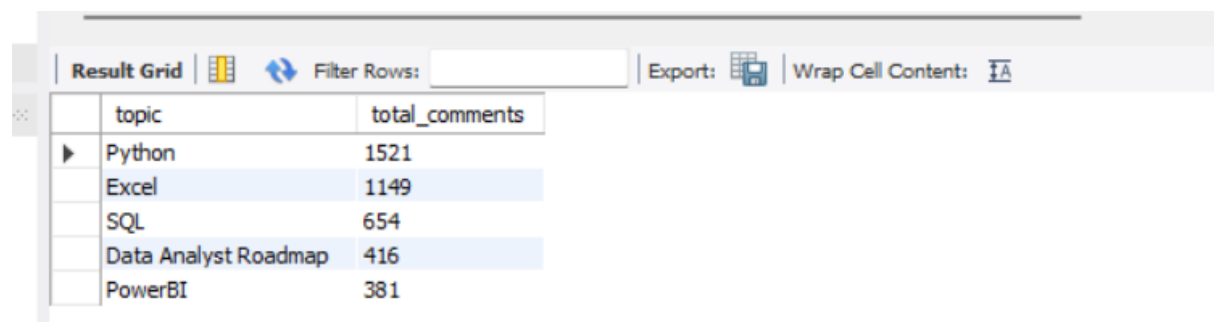

COUNT(*) AS total_comments

FROM youtube_comments

GROUP BY topic

ORDER BY total_comments DESC;

Result:

topic	total_comments
Python	1521
Excel	1149
SQL	654
Data Analyst Roadmap	416
PowerBI	381

F. Query 6:

Business Question:

Which learning topic receives the highest average likes?

SQL Concept Used:

- AVG()
- GROUP BY
- ROUND()
- ORDER BY

SQL Query:

SELECT

topic,

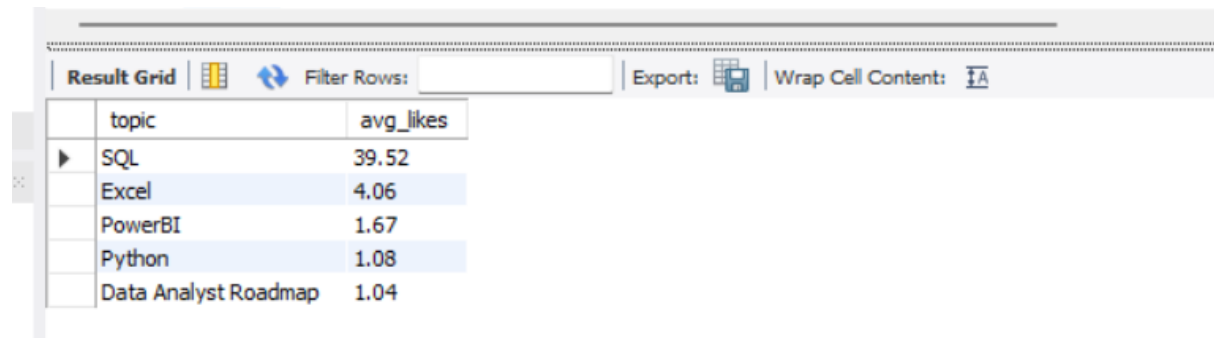

ROUND(AVG(likes),2) AS avg_likes

FROM youtube_comments

GROUP BY topic

ORDER BY avg_likes DESC;

Result:

The screenshot shows a data grid with a toolbar at the top containing 'Result Grid', a grid icon, a refresh icon, 'Filter Rows:', an 'Export:' button with a download icon, and a 'Wrap Cell Content:' button with a text icon. The table below has two columns: 'topic' and 'avg_likes'. The rows are SQL (39.52), Excel (4.06), PowerBI (1.67), Python (1.08), and Data Analyst Roadmap (1.04). The SQL row is highlighted with a blue background.

topic	avg_likes
SQL	39.52
Excel	4.06
PowerBI	1.67
Python	1.08
Data Analyst Roadmap	1.04

G. Query 7:

Business Question:

Which topic received the highest total likes?

SQL Concept Used:

- AVG()
- GROUP BY
- ROUND()
- ORDER BY

SQL Query:

SELECT

topic,

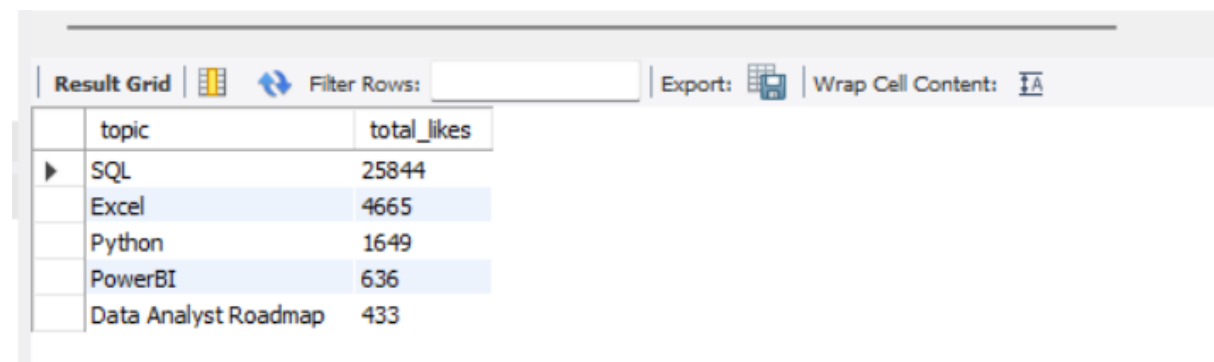

SUM(likes) AS total_likes

FROM youtube_comments

GROUP BY topic

ORDER BY total_likes DESC;

Result:

The screenshot shows a data grid with a toolbar at the top containing 'Result Grid', a grid icon, a refresh icon, 'Filter Rows:', an 'Export:' button with a download icon, and a 'Wrap Cell Content:' button with a text icon. The table below has two columns: 'topic' and 'total_likes'. The rows are SQL (25844), Excel (4665), Python (1649), PowerBI (636), and Data Analyst Roadmap (433). The SQL row is highlighted with a blue background.

topic	total_likes
SQL	25844
Excel	4665
Python	1649
PowerBI	636
Data Analyst Roadmap	433

H. Query 8:

Business Question:

Which individual comments received the highest appreciation?

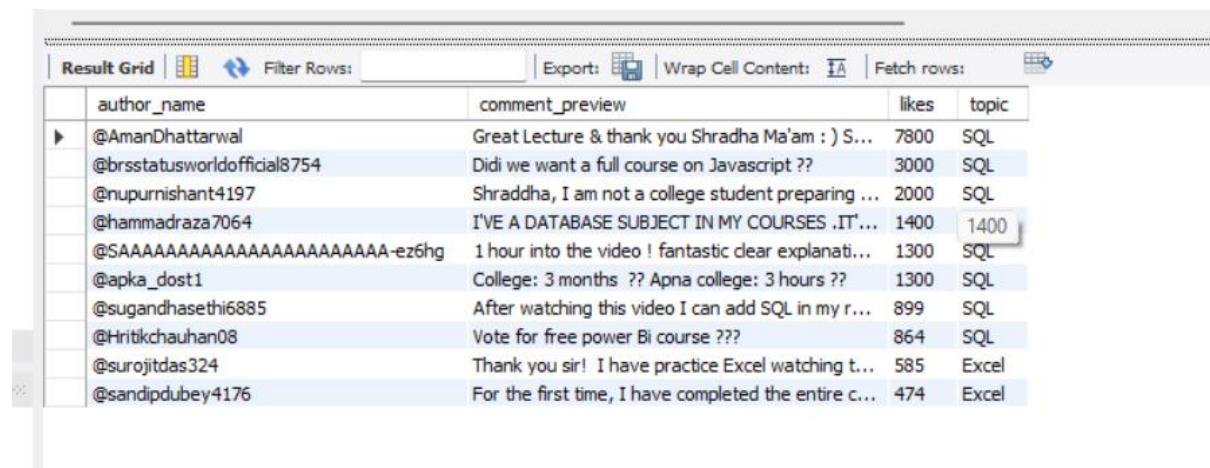

SQL Concept Used:

LEFT(comment_text,100)

SQL Query:

```
SELECT
    author_name,
    LEFT(comment_text,100) AS comment_preview,
    likes,
    topic
FROM youtube_comments
ORDER BY likes DESC
LIMIT 10;
```

Result:

The screenshot shows a 'Result Grid' interface with a table of 10 rows. The columns are 'author_name', 'comment_preview', 'likes', and 'topic'. The rows are sorted by 'likes' in descending order. The first row has 7800 likes and the topic is 'SQL'. The second row has 3000 likes and the topic is 'SQL'. The third row has 2000 likes and the topic is 'SQL'. The fourth row has 1400 likes and the topic is 'SQL'. The fifth row has 1300 likes and the topic is 'SQL'. The sixth row has 1300 likes and the topic is 'SQL'. The seventh row has 899 likes and the topic is 'SQL'. The eighth row has 864 likes and the topic is 'SQL'. The ninth row has 585 likes and the topic is 'Excel'. The tenth row has 474 likes and the topic is 'Excel'.

I. Query 9:

Business Question:

Which topic generates the most discussion?

SQL Concept Used:

- AVG()
- GROUP BY
- ROUND()
- ORDER BY

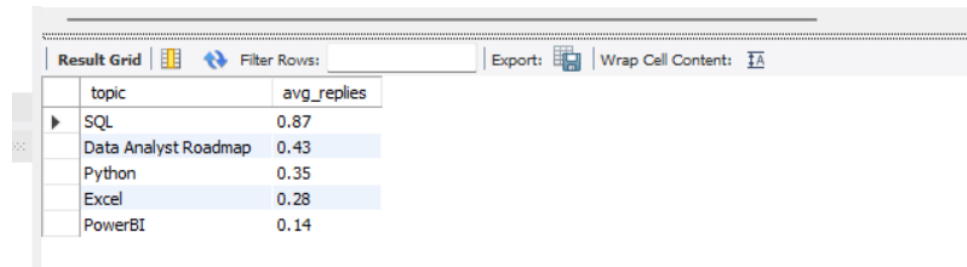

SQL Query:

```
SELECT
    topic,
    ROUND(AVG(reply_count),2) AS avg_replies
FROM youtube_comments
```

GROUP BY topic

ORDER BY avg_replies DESC;

Result:

topic	avg_replies
SQL	0.87
Data Analyst Roadmap	0.43
Python	0.35
Excel	0.28
PowerBI	0.14

J. Query 10:

Business Question:

Which topic has the highest total number of replies?

SQL Concept Used:

- AVG()
- GROUP BY
- ROUND()
- ORDER BY

SQL Query:

SELECT

topic,

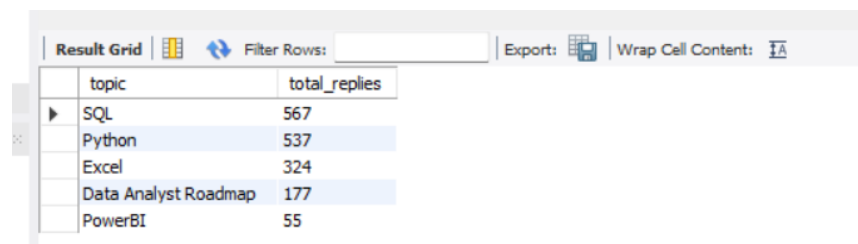

SUM(reply_count) AS total_replies

FROM youtube_comments

GROUP BY topic

ORDER BY total_replies DESC;

Result:

topic	total_replies
SQL	567
Python	537
Excel	324
Data Analyst Roadmap	177
PowerBI	55

K. Query 11:

Business Question:

Which comments started the biggest conversations?

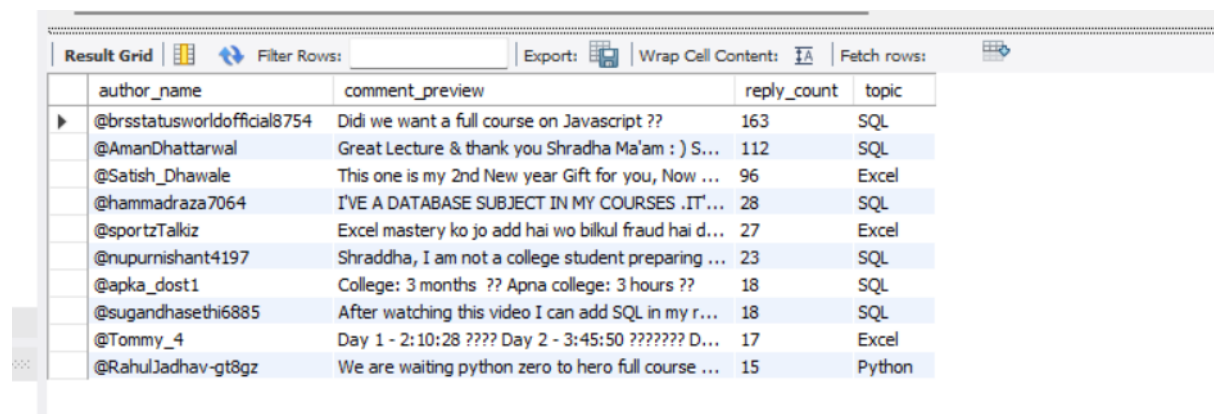

SQL Concept Used:

- AVG()
- GROUP BY
- ROUND()
- ORDER BY

SQL Query:

```
SELECT
    author_name,
    LEFT(comment_text,100) AS comment_preview,
    reply_count,
    topic
FROM youtube_comments
ORDER BY reply_count DESC
LIMIT 10;
```

Result:

The screenshot shows a database interface with a 'Result Grid' tab. The grid displays the results of the SQL query, ordered by reply count in descending order. The columns are author_name, comment_preview, reply_count, and topic. The first row shows a comment by @brsstatusworldofficial8754 with 163 replies on the topic of SQL. The last row shows a comment by @RahulJadhav-gt8gz with 15 replies on the topic of Python.

author_name	comment_preview	reply_count	topic

L. Query 12:

Business Question:

Which videos generated the highest engagement?

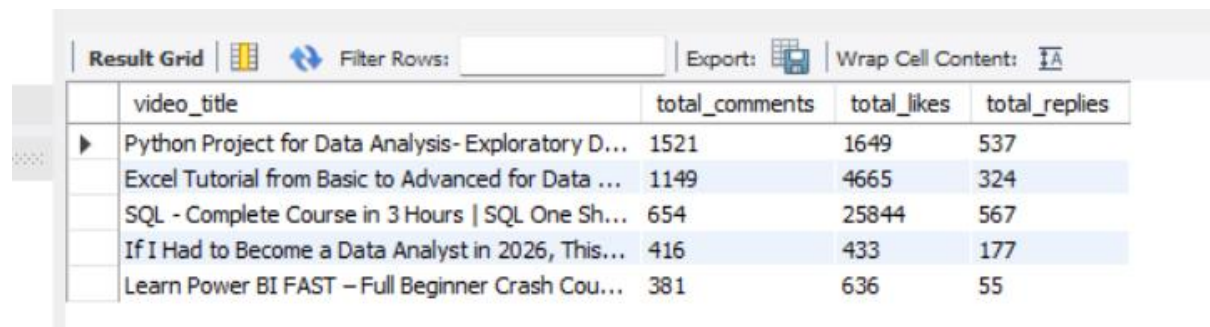

SQL Concept Used:

- AVG()
- GROUP BY
- ROUND()
- ORDER BY

SQL Query:

```
SELECT
    video_title,
    COUNT(*) AS total_comments,
    SUM(likes) AS total_likes,
    SUM(reply_count) AS total_replies
FROM youtube_comments
GROUP BY video_title
ORDER BY total_comments DESC;
```

Result:

The screenshot shows a database interface with a 'Result Grid' tab. It contains a table with 5 columns: 'video_title', 'total_comments', 'total_likes', and 'total_replies'. The table lists 5 videos, with the first one having the highest number of comments (1521).

M. Query 13:

Business Question:

Who comments the most?

SQL Concept Used:

COUNT(), GROUP BY, ORDER BY, LIMIT

SQL Query:

SELECT

author_name,

COUNT(*) AS total_comments

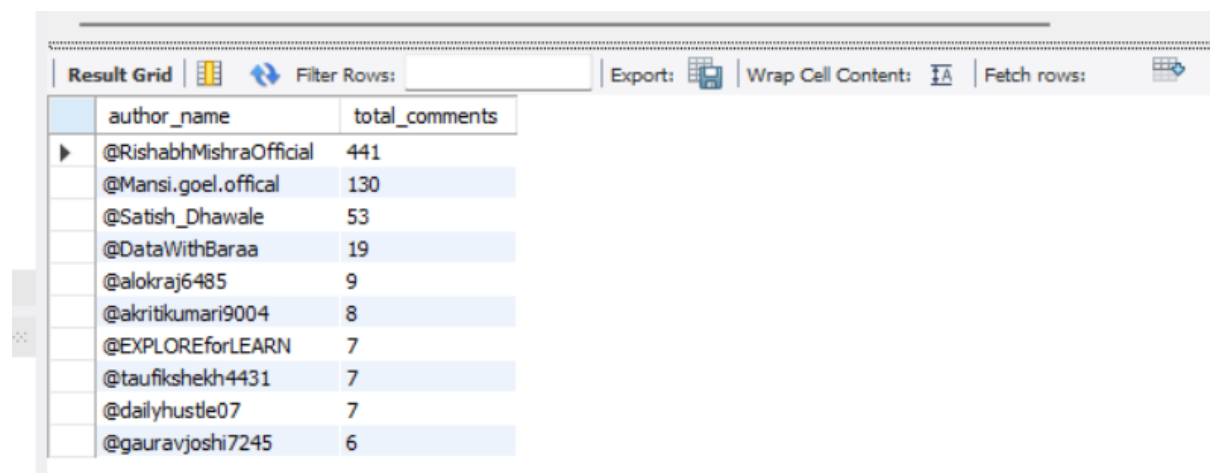

FROM youtube_comments

GROUP BY author_name

ORDER BY total_comments DESC

LIMIT 10;

Result:

The screenshot shows a database interface with a 'Result Grid' tab. It contains a table with 2 columns: 'author_name' and 'total_comments'. The table lists the top 10 authors based on the number of comments they have received, with '@RishabhMishraOfficial' having the highest count (441).

author_name	total_comments
@RishabhMishraOfficial	441
@Mansi.goel.offical	130
@Satish_Dhawale	53
@DataWithBaraa	19
@alokraj6485	9
@akritikumari9004	8
@EXPLOREforLEARN	7
@taufikshekh4431	7
@dailyhustle07	7
@gauravjoshi7245	6

N. Query 14:

Business Question:

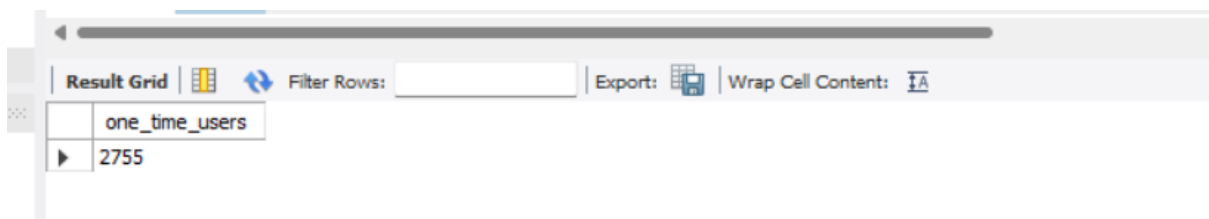

How many users interacted only once?

SQL Concept Used:

SQL Query:

```
SELECT COUNT(*) AS one_time_users  
FROM (  
    SELECT  
        author_name  
    FROM youtube_comments  
    GROUP BY author_name  
    HAVING COUNT(*) = 1  
) AS t;
```

Result:

The screenshot shows a database query result grid. The grid has two columns: 'one_time_users' and a value of 2755. The interface includes a toolbar with options like 'Result Grid', 'Filter Rows', 'Export', and 'Wrap Cell Content'.

one_time_users
2755

O. Query 15:

Business Question:

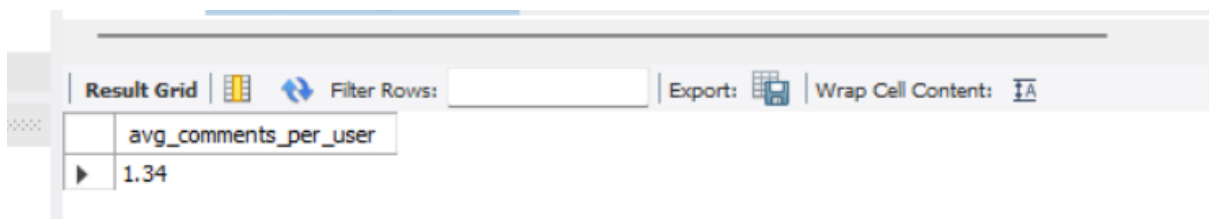

Average Comments per User

SQL Concept Used:

SQL Query:

```
SELECT  
    ROUND(COUNT(*)/COUNT(DISTINCT author_name),2)  
    AS avg_comments_per_user  
FROM youtube_comments;
```

Result:

The screenshot shows a database query result grid. The grid has two columns: 'avg_comments_per_user' and a value of 1.34. The interface includes a toolbar with options like 'Result Grid', 'Filter Rows', 'Export', and 'Wrap Cell Content'.

avg_comments_per_user
1.34

P. Query 16:

Business Question:

Comments Containing "SQL"

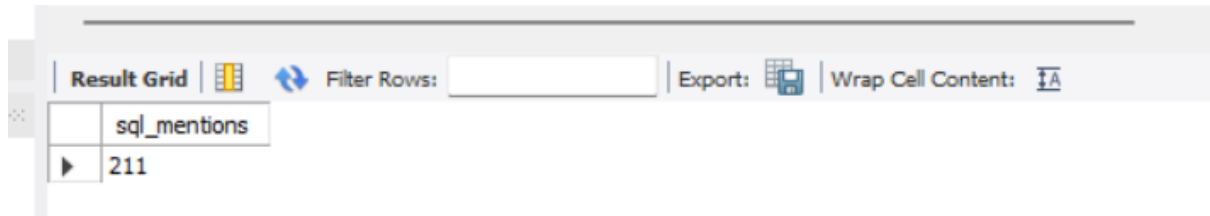

SQL Concept Used:

LIKE

SQL Query:

```
SELECT COUNT(*) AS sql_mentions
FROM youtube_comments
WHERE comment_text LIKE '%SQL%';
```

Result:

sql_mentions
211

Q. Query 17:

Business Question:

Comments Containing "Python"

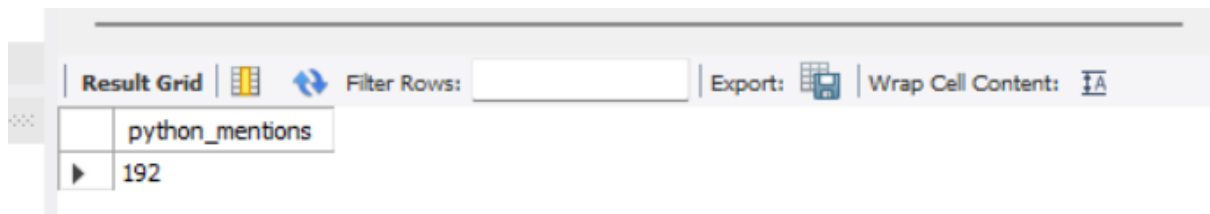

SQL Concept Used:

LIKE

SQL Query:

```
SELECT COUNT(*) AS python_mentions
FROM youtube_comments
WHERE comment_text LIKE '%Python%';
```

Result:

python_mentions
192

R. Query 18:

Business Question:

Comments Containing "Excel"

SQL Concept Used:

LIKE

SQL Query:

```
SELECT COUNT(*) AS excel_mentions
FROM youtube_comments
WHERE comment_text LIKE '%Excel%';
```

Result:

Result Grid	Filter Rows:	Export:	Wrap Cell Content:
excel_mentions			
223			

S. Query 19:

Business Question:

Comments Containing "Power BI"

SQL Concept Used:

LIKE

SQL Query:

```
SELECT COUNT(*) AS powerbi_mentions
```

```
FROM youtube_comments
```

```
WHERE comment_text LIKE '%Power BI%';
```

Result:

Result Grid	Filter Rows:	Export:	Wrap Cell Content:
powerbi_mentions			
155			

T. Query 20:

Business Question:

Comments Containing "Job"

SQL Concept Used:

LIKE

SQL Query:

```
SELECT COUNT(*) AS job_mentions
```

```
FROM youtube_comments
```

```
WHERE comment_text LIKE '%job%';
```

Result:

Result Grid	Filter Rows:	Export:	Wrap Cell Content:
job_mentions			
102			

U. Query 21:

Business Question:

Comments Containing "Interview"

SQL Concept Used:

LIKE

SQL Query:

```
SELECT COUNT(*) AS interview_mentions  
FROM youtube_comments  
WHERE comment_text LIKE '%interview%';
```

Result:

The screenshot shows a database interface with a toolbar at the top containing 'Result Grid', 'Filter Rows', 'Export', and 'Wrap Cell Content'. Below the toolbar is a table with one row. The first column is labeled 'interview_mentions' and the second column contains the value '31'.

interview_mentions
31

V. Query 22:

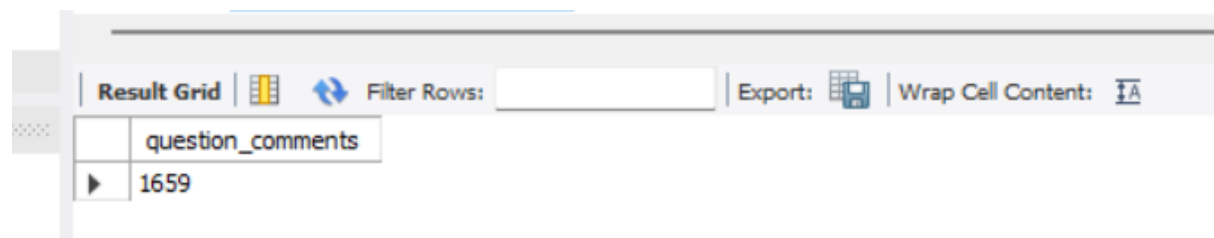

Business Question:

How many users are asking questions?

SQL Query:

```
SELECT COUNT(*) AS question_comments  
FROM youtube_comments  
WHERE comment_text LIKE '%?%';
```

Result:

The screenshot shows a database interface with a toolbar at the top containing 'Result Grid', 'Filter Rows', 'Export', and 'Wrap Cell Content'. Below the toolbar is a table with one row. The first column is labeled 'question_comments' and the second column contains the value '1659'.

question_comments
1659

W. Query 23:

Business Question:

How long are the comments on average?

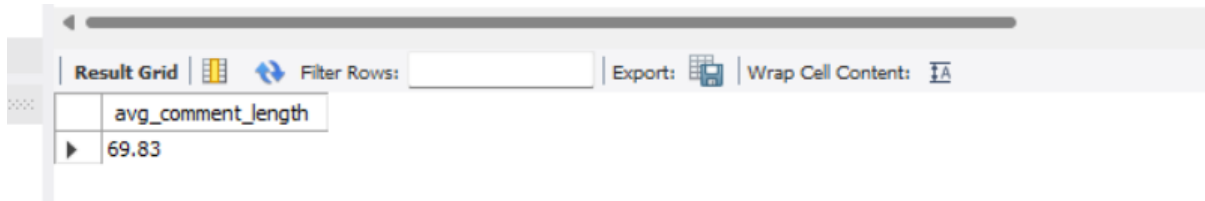

SQL Concept Used:

LENGTH()

SQL Query:

```
SELECT  
ROUND(AVG(LENGTH(comment_text)),2) AS avg_comment_length  
FROM youtube_comments;
```

Result:

avg_comment_length
69.83

X. Query 24:

Business Question:

Longest Comment

SQL Concept Used:

LENGTH()

SQL Query:

SELECT

author_name,

LEFT(comment_text,200) AS comment_preview,

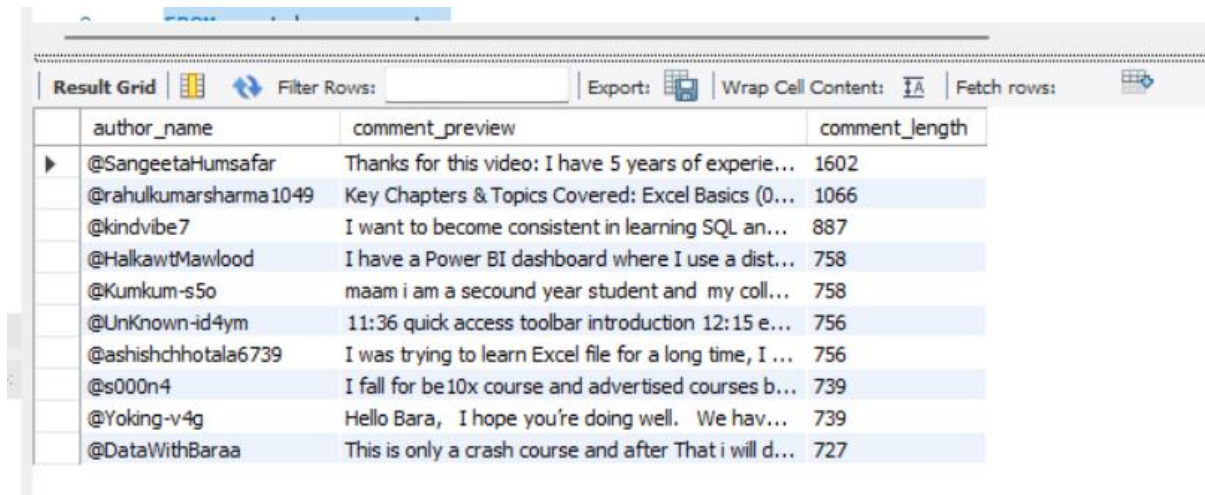

LENGTH(comment_text) AS comment_length

FROM youtube_comments

ORDER BY comment_length DESC

LIMIT 10;

Result:

author_name	comment_preview	comment_length

FF. Query 32:

Business Question:

Number of Empty Comments

SQL Concept Used:

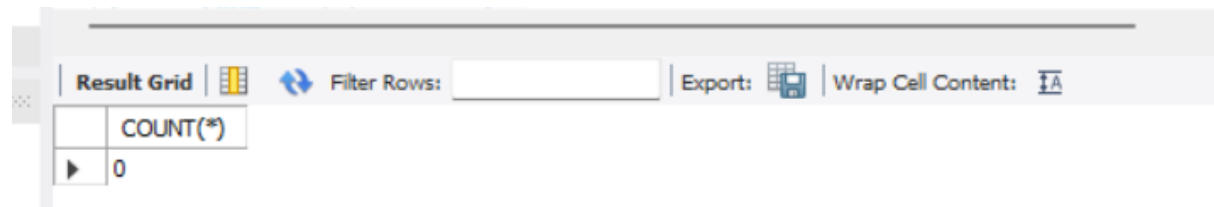

SQL Query:

- TRIM
- SELECT COUNT(*)

FROM youtube_comments

WHERE TRIM(comment_text)='';

Result:

The screenshot shows a database interface with a toolbar at the top containing 'Result Grid', 'Filter Rows', 'Export', and 'Wrap Cell Content'. Below the toolbar is a table with one column labeled 'COUNT(*)' and one row containing the value '0'.

COUNT(*)
0

GG. Query 33:

Business Question:

Can we classify comments based on engagement?

SQL Concept Used:

CASE

SQL Query:

SELECT

comment_id,

likes,

CASE

WHEN likes >= 3 THEN 'High Engagement'

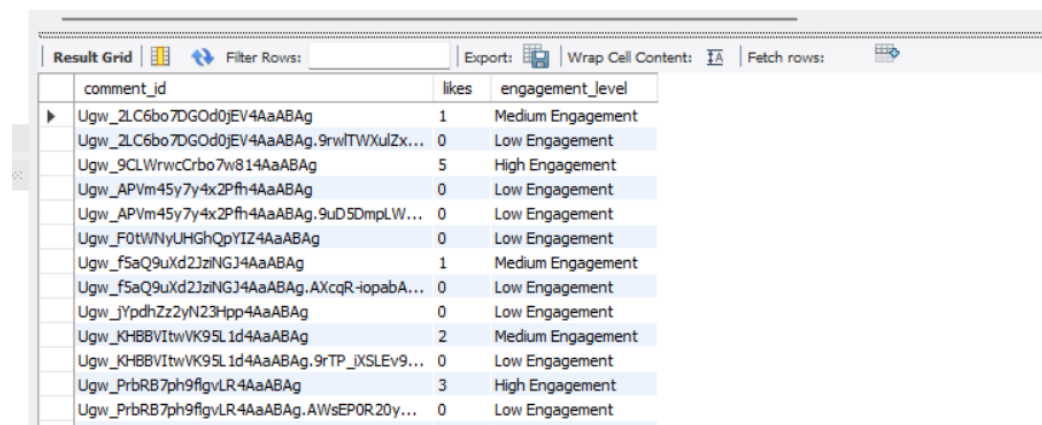

WHEN likes BETWEEN 1 AND 2 THEN 'Medium Engagement'

ELSE 'Low Engagement'

END AS engagement_level

FROM youtube_comments;

Result:

The screenshot shows a database interface with a toolbar at the top containing 'Result Grid', 'Filter Rows', 'Export', 'Wrap Cell Content', and 'Fetch rows'. Below the toolbar is a table with four columns: 'comment_id', 'likes', and 'engagement_level'. The table contains 15 rows of data.

II. Query 35:

Business Question:

Dense Rank Videos

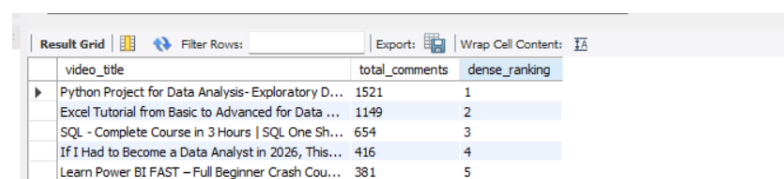

SQL Concept Used:

RANK

SQL Query:

```
SELECT
    video_title,
    COUNT(*) AS total_comments,
    DENSE_RANK() OVER(ORDER BY COUNT(*) DESC) AS dense_ranking
FROM youtube_comments
GROUP BY video_title;
```

Result:

	video_title	total_comments	dense_ranking
▶	Python Project for Data Analysis- Exploratory D...	1521	1
	Excel Tutorial from Basic to Advanced for Data ...	1149	2
	SQL - Complete Course in 3 Hours SQL One Sh...	654	3

JJ. Query 36:

Business Question:

Row Number for Comments

SQL Concept Used:

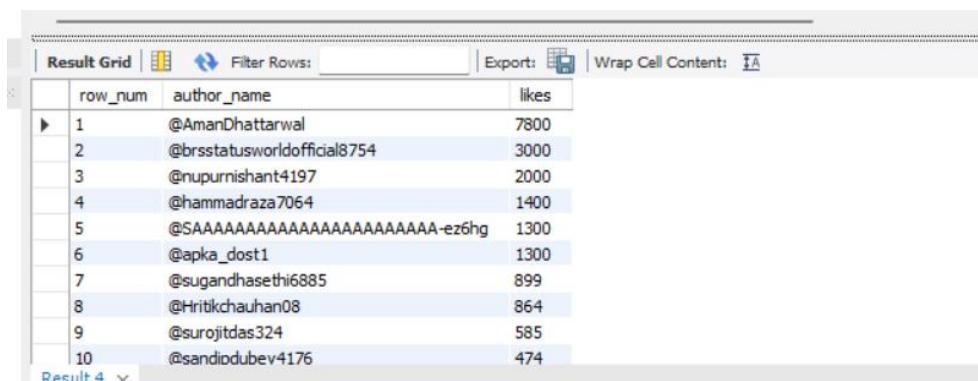

SQL Query:

SELECT

```
    ROW_NUMBER() OVER(ORDER BY likes DESC) AS row_num,  
    author_name,  
    likes
```

FROM youtube_comments;

Result:

The screenshot shows a database query result grid with the following data:

row_num	author_name	likes
1	@AmanDhattarwal	7800
2	@brsstatusworldofficial8754	3000
3	@nupurnishant4197	2000
4	@hammadraza7064	1400
5	@SAAAAAAAAAAAAAAAAAAAAAA-ez6hg	1300
6	@apka_dost1	1300
7	@sugandhasethi6885	899
8	@Hritkchauhan08	864
9	@surojitdas324	585
10	@sandiodubev4176	474

KK. Query 37:

Business Question:

Top Comment Per Topic (Window Function)

SQL Concept Used:

SQL Query:

SELECT *

FROM (

SELECT

topic,

author_name,

likes,

comment_text,

ROW_NUMBER() OVER(PARTITION BY topic ORDER BY likes DESC) AS rn

FROM youtube_comments

) ranked

WHERE rn = 1;

Result:

Result Grid					
Filter Rows:					
Export: Export					
Wrap Cell Content: Wrap					
	topic	author_name	likes	comment_text	rn

LL. Query 38:

Business Question:

Create a View

SQL Concept Used:

SQL Query:

```
CREATE VIEW topic_summary AS
```

```
SELECT
```

```
    topic,
```

```
    COUNT(*) AS total_comments,
```

```
    SUM(likes) AS total_likes,
```

```
    AVG(reply_count) AS avg_replies
```

```
FROM youtube_comments
```

```
GROUP BY topic;
```

```
SELECT * FROM topic_summary;
```

Result:

Result Grid				
Filter Rows:				
Export: Export				
Wrap Cell Content: Wrap				
	topic	total_comments	total_likes	avg_replies
▶	Python	1521	1649	0.3531
	SQL	654	25844	0.8670
	Excel	1149	4665	0.2820
	Data Analyst Roadmap	416	433	0.4255
	PowerBI	381	636	0.1444

MM. Query 39:

Business Question:

CTE (Common Table Expression)

SQL Concept Used:

SQL Query:

```
WITH topic_stats AS (
```

```
    SELECT
```

```

        topic,
        COUNT(*) AS total_comments
    FROM youtube_comments
    GROUP BY topic
)
SELECT *
FROM topic_stats
ORDER BY total_comments DESC;
Result:

```

Result Grid		Filter Rows:	Export:	Wrap Cell Content:
	topic	total_comments		
▶	Python	1521		
	Excel	1149		
	SQL	654		
	Data Analyst Roadmap	416		
	PowerBI	381		

NN. Query 40:

Business Question:

Which comments performed better than the average?

SQL Concept Used:

SQL Query:

```

SELECT *
FROM youtube_comments
WHERE likes >
(
    SELECT AVG(likes)
    FROM youtube_comments
);

```

Result:

Result Grid		Filter Rows:	Edit:	Export/Imports:	Wrap Cell Content:	
	comment_id	author_name	author_is_channel_owner	comment_text	creator_hearted	video_url
